PROFILE

Motivated third-year Software Engineering student at the Catholic University Institute of Buea (CUIB) with strong skills in mobile and backend development. Experienced in building real-world fintech applications using Flutter and Firebase. Passionate about digital payments, mobile money systems, and solving practical problems in telecom and financial technology.

TECHNICAL SKILLS

- Programming Languages: Dart (Flutter), Java, Python
 - Mobile Development: Flutter (Android & iOS)
 - Backend & Database: Firebase (Firestore), REST APIs
 - Tools: Git, GitHub, Postman
 - Concepts: API Integration, System Design, Database Management
-

PROJECTS

OnwaPay – Fintech Mobile Application (Flutter + Firebase)

- Developed a mobile application for digital payments and transaction management
- Implemented features such as sending funds, buying airtime, and bill payments
- Integrated Firebase Firestore for real-time data storage and backend services
- Designed the system for future integration with mobile money services (MTN & Orange)
- Focused on improving user experience and transaction efficiency

EDUCATION

Bachelor of Science in Software Engineering (In Progress)

Level 300 (3rd Year)

Catholic University Institute of Buea (CUIB)

EXPERIENCE

Personal Software Development Projects

- Designed and developed mobile applications solving real-world problems
- Practiced backend integration and API communication
- Continuously improving coding, debugging, and system design skills

ADDITIONAL SKILLS

- Strong communication and public speaking skills
- Ability to present and explain technical ideas clearly
- Team collaboration and adaptability
- Problem-solving mindset

CAREER OBJECTIVE

To gain practical experience in a dynamic telecom or fintech environment where I can apply my software development skills, contribute to real projects, and grow into a professional software engineer.
